

Table of contents

Volume 1

Past Recipients of CERRA Award	XX
Preface	XXI
Conference organization	XXIII

Keynote papers

Risk analysis: Examples and discussion <i>Brillinger, D.R.</i>	3
Risk and reliability analysis for flood protection systems in The Netherlands <i>Vrouwenvelder, T.</i>	13
Socially relevant structural safety <i>Corotis, R.B.</i>	15

Theme A: Reliability methods

Time-variant reliability using the PHI2 method: Principles and validation by Monte Carlo simulation <i>Andrieu-Renaud, C., Lemaire, M. & Sudret, B.</i>	27
SORM: Some common misunderstandings and errors <i>Breitung, K.</i>	35
Response surface for seismic fragility analysis of RC structures <i>Franchin, P., Lupoi, A., Pinto, P.E. & Schotanus, M.J.J.</i>	41
A system-based approach for time-variant structural reliability analyses <i>Fu, Q. & Menun, C.</i>	49
A comparison of some numerical methods for estimating time-invariant reliability <i>Gray, W. & Melchers, R.E.</i>	57
Approximation of implicit limit state functions with Support Vector Machines and Vector Quantization <i>Hurtado, J.E.</i>	63
Analysis of uncertain structural systems under white noise excitation by a response surface method <i>Impollonia, N. & Ricciardi, G.</i>	69

Time-dependent system reliability of deteriorating reinforced concrete structures <i>Li, C.Q., Lawanwisut, W. & Zheng, J.J.</i>	77
New developments in directional methods for system reliability assessment <i>Nie, J. & Ellingwood, B.R.</i>	85
Small-sample probabilistic assessment - FREET software <i>Novák, D., Vořechovský, M. & Rusina, R.</i>	91
Representation of random variables using orthogonal polynomials <i>Phoon, K-K.</i>	97
Reliability analysis of the metal forming process <i>Radi, B. & El Hami, A.</i>	105
Bounds on system reliability by linear programming and applications to electrical substations <i>Song, J. & Der Kiureghian, A.</i>	111
Statistical correlation in stratified sampling <i>Vořechovský, M. & Novák, D.</i>	119
Adaptive directional simulation for structural reliability estimation <i>Yonezawa, M. & Park, Y-T.</i>	125
Reliability analysis of light-frame wall systems using a portfolio approach <i>Yu, G. & Rosowsky, D.V.</i>	133
 <i>Theme B: Uncertainty analyses</i>	
Uncertainty, parameter sensitivity and Bayesian updating in the problem of viscous heating of fluid dampers <i>Black, C.J. & Makris, N.</i>	141
Self-organised criticality and Jaynes' entropy <i>Brown, C.B.</i>	149
Compatibility between prior and likelihood distributions and weighting in Bayesian approach applied to reliability assessment <i>Guérin, F., Dumon, B. & Usureau, E.</i>	155
Risk assessment of steel buildings and occupants under fire situation <i>Holický, M.</i>	163
Probabilistic assessment on the basis of interval data <i>Huyse, L. & Thacker, B.H.</i>	169
A stochastic response surface method for random field problems <i>Mahadevan, S., Huang, S. & Rebba, R.</i>	177
Seismic fragility assessment based on Bayesian updating <i>Osaki, T. & Takada, T.</i>	185
Accidental explosions: Bayesian uncertainty handling in assessing damage to structures <i>Vaidogas, E.R.</i>	191
 <i>Theme C: Stochastic methods</i>	
Distribution of eigenvalues of linear stochastic systems <i>Adhikari, S. & Langley, R.S.</i>	201
A model for non-stationary and anisotropic polycrystalline microstructures <i>Arwade, S.R. & Grigoriu, M.</i>	209
Numerical convergence of a spectral stochastic finite element method (SSFEM) in lognormal context <i>Baroth, J., Bodé, L., Bressolette, P. & Fogli, M.</i>	217

Sensitivity of seismically excited structural system by modal analysis <i>Cacciola, P., Colajanni, P. & Muscolino, G.</i>	225
The non geometric spectral moments in reliability of structures for non stationary filtered input <i>Caddemi, S., Duca, I. & Muscolino, G.</i>	233
An improved stochastic model for the out-of-straightness imperfection of the columns <i>Cafarella, F.</i>	243
Uncertain non-linear dynamical systems subjected to seismic loads <i>Desceliers, C., Soize, C. & Cambier, S.</i>	251
Slepian simulation of plastic displacement distributions for shear frame excited by filtered Gaussian white noise ground motion <i>Ditlevsen, O. & Lazarov, B.</i>	259
Transient dynamics induced by shocks in stochastic structures <i>Duchereau, J. & Soize, C.</i>	267
Second order statistical response of a bilinear hysteretic oscillator excited by non stationary stochastic processes <i>Flores, E., Ayala, A.G. & Ordaz, M.</i>	275
Stochastic finite element analysis of non-linear structures modelled by plasticity theory <i>Frier, C. & Sørensen, J.D.</i>	283
On the stochastic stability of deformation processes <i>Gitman, M.B., Gitman, I.M. & Askes, H.</i>	291
Convergence studies in non-linear finite element response sensitivity analysis <i>Gu, Q. & Conte, J.P.</i>	297
Developments in finite element reliability and sensitivity analysis of non-linear structures <i>Haukaas, T. & Der Kiureghian, A.</i>	305
Reliability assessment of real structures <i>Huh, J., Haldar, A. & Lee, S.Y.</i>	313
Non-Gaussian model for spatially coherent seismic ground motions <i>Kafali, C. & Grigoriu, M.</i>	321
Importance sampling of first-excursion probability for non-linear systems <i>Koo, H. & Der Kiureghian, A.</i>	329
Simulation of binary random fields: Application to random media <i>Koutsourelakis, P.S. & Deodatis, G.</i>	337
Computational model validation under uncertainty <i>Mahadevan, S. & Rebba, R.</i>	345
Non-linear filters using Monte Carlo integration for conditional random fields <i>Maruyama, O. & Hoshiya, M.</i>	353
“Moving Least Squares”-elements for stochastic crack propagation simulations coupled with stochastic finite elements <i>Most, T. & Bucher, C.</i>	359
Probabilistic risk assessment of homogeneous earth dams <i>Mrabet, Z. & Bouayed, A.</i>	367
Improved numerical calculation of the crossing rate of second order stochastic volterra systems <i>Naess, A. & Karlsen, H.C.</i>	373
Fuzzy probabilistic structural analysis considering fuzzy random functions <i>Sickert, J.-U., Beer, M., Graf, W. & Möller, B.</i>	379

Quadrature method for finite element reliability analysis <i>Sudret, B. & Cherradi, I.</i>	387
Solution for stochastic structural response with the aid of FPK-equation and standard FEM software for diffusion problems <i>Varpasuo, P.</i>	395
Modeling wave loads on ships using peaks over threshold method <i>Wang, L. & Moan, T.</i>	401
Simulation of non-stationary processes based on Hilbert spectra <i>Wen, Y.K. & Gu, P.</i>	409
 <i>Theme D: System identification and model selection</i>	
Modal analysis of a densely instrumented building using strong motion data <i>Arici, Y. & Mosalam, K.M.</i>	419
Accuracy of system identification in the presence of random fields <i>Bucher, C., Huth, O. & Macke, M.</i>	427
Probabilistic model selection for systems with design constraints <i>Field, R.V. Jr., Grigoriu, M. & Wojtkiewicz, S.F.</i>	435
Likelihood updating of random process load and resistance parameters by monitoring <i>Friis-Hansen, P. & Ditlevsen, O.</i>	443
Bayesian updating of non-linear structural system models subjected to seismic disturbances: Relations between simplified and detailed models <i>Izquierdo, F., Esteva, L. & Heredia-Zavoni, E.</i>	451
Experimental verification of μ -synthesis controller for a seismic-excited laboratory model of a three-story building <i>Min, K-W., Lee, Y-C., Park, M-K., Joo, S-J., Kim, J-K. & Ho, K-C.</i>	459
Health monitoring and damage detection in base-excited structures using the Intelligent Parameter Varying (IPV) technique <i>Saadat, S., Noori, M.N., Buckner, G.D. & Furukawa, T.</i>	467
Probabilistic damage estimation of a steel frame model through vibration tests <i>Saito, T., Mase, S. & Morita, K.</i>	473
A time-domain system identification technique with optimum number of finite elements <i>Vo, P.H., Haldar, A. & Ling, X.</i>	481
 <i>Theme E: Damage and deterioration</i>	
Use of a mixed-effects approach for the estimation of the parameters of a non-linear pavement rutting model <i>Archilla, A.R.</i>	489
Stochastic methods for the estimation of potential seismic damage <i>Askan, A. & Yüçemen, M.S.</i>	497
Reliability assessment of a reinforced concrete beam subjected to corrosion <i>Capra, B., Sellier, A. & Hamsa, S.</i>	503
Damage detection via response surface approximations <i>Casciati, F., Casciati, S. & Faravelli, L.</i>	511

Detecting beam-column connection failures in ASCE Phase II simulated benchmark studies using a two-step Bayesian structural health monitoring approach <i>Ching, J.-Y. & Beck, J.L.</i>	517
Reliability of service life predictions for concrete under sulfate attack <i>Corr, D., Graham-Brady, L., Igusa, T. & Der Kiureghian, A.</i>	525
Simulation of random material properties and local maximum stresses and strains in concrete <i>Corr, D. & Graham-Brady, L.</i>	533
Spatial variability of pitting corrosion and its effect on the reliability of prestressing wires <i>Darmawan, M.S. & Stewart, M.G.</i>	541
Modeling the spatial correlation on pipelines under corrosion <i>De León, D. & Macías, O.F.</i>	549
Statistical comparison between ASTM-C 1018 and JSCE-SF 4 toughness methods for fiber reinforced concrete <i>Emerson, R.N. & Mulay, A.S.</i>	555
Three different models for reliability of building porous materials over time <i>Garavaglia, E. & Pavani, R.</i>	561
Direct computation of statistical size effects in quasi-brittle solids <i>Gutiérrez, M.A.</i>	567
Whole life assessment of corrosion affected reinforced concrete structures <i>Lawanwisut, W., Li, C.Q. & Aguiar, S.D.</i>	573
Statistical damage detection using time series analysis on a structural health monitoring benchmark problem <i>Lei, Y., Kiremidjian, A., Nair, K.K., Lynch, J.P., Law, K.H., Kenny, T.W., Carryer, E. & Kottapalli, A.</i>	581
Response surface parameterization for estimation of fatigue damage and extreme response of marine structures <i>Leira, B.J., Holmås, T. & Herfjord, K.</i>	589
A new model for marine immersion corrosion in structural reliability assessment <i>Melchers, R.E.</i>	599
Computing infrastructure transition probabilities using duration models in the presence of multiple condition states <i>Mishalani, R.G. & Madanat, S.M.</i>	605
Practical method of reliability-based condition assessment of existing structures <i>Mori, Y. & Kato, T.</i>	613
Computational modeling of statistical size effect in quasibrittle structures <i>Novák, D., Bažant, Z.P. & Vořechovský, M.</i>	621
Development of empirical building performance functions data from past earthquakes <i>Sarabandi, P., Pachakis, D., King, S. & Kiremidjian, A.</i>	629
Damage model for reinforced concrete elements <i>Sasani, M. & Bažan, M.</i>	637
Probabilistic modelling of deterioration mechanisms for concrete structures <i>Stewart, M.G. & Faber, M.H.</i>	645
Reliability testing of mechanical products - Application of statistical accelerated life testing models <i>Tebbi, O., Guérin, F. & Dumon, B.</i>	653
Durability of suspension bridge steel cables <i>Yotte, S., Breyse, D., Crémona, C. & Brevet, P.</i>	661

Theme F: Loss estimation

Uncertainty specification and propagation for loss estimation using FOSM methods <i>Baker, J.W. & Cornell, C.A.</i>	669
Life cycle cost including seismic insurance cost <i>Hoshiya, M.</i>	677
Life Quality Method versus Cost-Benefit Analysis for short-span slab bridges <i>Imhof, D. & Middleton, C.R.</i>	681
Probabilistic framework to earthquake loss estimation <i>Keshishian, P.</i>	689
Life cycle cost oriented tradeoff analysis of seismic steel frame designs via genetic algorithms <i>Liu, M., Burns, S.A. & Wen, Y.K.</i>	697
Estimation of operating losses from earthquake damage to major sea ports <i>Pachakis, D. & Kiremidjian, A.</i>	703
A reinterpretation of Life-Quality Index for Cost-Benefit Analysis of safety programs <i>Pandey, M.D. & Nathwani, J.S.</i>	711
Optimum reliability for building portfolio considering spatial correlation of loads <i>Nishijima, K. & Kanda, J.</i>	719
Discounting for optimal and acceptable technical facilities <i>Rackwitz, R.</i>	725
Benefit-Cost Analysis for mitigating seismic losses: Probabilistic evaluation of retrofit measures for residential buildings in Turkey <i>Smyth, A.W., Deodatis, G., Franco, G., Kunreuther, H. & Luş, H.</i>	735
Estimation of earthquake damage considering time use of day <i>Takahashi, T. & Kubota, D.</i>	743
Application of an importance sampling method to risk models in insurance theory <i>Tanaka, H., Ichida, Y. & Toyoda-Makino, M.</i>	749
Life-cycle cost analysis as a tool for decision making <i>Val, D.V. & Stewart, M.G.</i>	757
Building-specific seismic fatality estimation methodology <i>Yeo, G.L. & Cornell, C.A.</i>	765

Theme G: Risk assessment and management

Protecting existing structures against unforeseen events <i>Agarwal, J.</i>	775
Risk and uncertainty <i>Corotis, R.B.</i>	781
Systemic foundations of risk management <i>Elms, D.</i>	787
Statistical damage modeling and analysis of industrial accidents and its application to industrial safety problems <i>Hanayasu, S. & Sekine, K.</i>	793
Consent probability in civil engineering <i>Lind, N. & Thedéen, T.</i>	801
Uncertainty in risk assessment <i>Lind, N.</i>	807

Earthquake structural retrofitting of electric power networks under economic constraints <i>Nuti, C. & Vanzi, I.</i>	813
Mitigation of seismic risk for networks of hospitals <i>Nuti, C., Santini, S. & Vanzi, I.</i>	821
Ten years experience in Linear Facilities Risk Assessment (LFRA) <i>Oboni, F.</i>	829
Probabilistic decision support for regional seismic risk assessment and mitigation <i>Park, J., Dueñas-Osorio, L., Goodno B., Craig, J. & Bostrom, A.</i>	837
Structural reliability assessments for risk management during repair of Tempe bridge <i>Reid, S.G.</i>	843

Theme H: Hazard analysis

A hurricane damage prediction model for residential structures <i>Cope, A.D., Gurley, K., Filliben, J.J., Simiu, E., Pinelli, J-P., Subramanian, C., Zhang, L. & Hamid, S.</i>	851
Assessment of low flows by POT analysis in Pangani river basin, Tanzania <i>Kazumba, S. & Honjo, Y.</i>	859
Probabilistic prediction of peak flood discharges <i>Lefebvre, M., Ribeiro, J., Rousselle, J., Seidou, O. & Lauzon, N.</i>	867
Statistical simulations of earthquake occurrence behaviors from active fault systems across the Japanese archipelago <i>Sugai, M., Hatori, T., Nishikawa, S. & Matsuo, M.</i>	873
Pilot case flood risk <i>van Manen, S.E. & Brinkhuis, M.</i>	881
Synthesis of a multivariate extreme sea climate <i>Webbers, P.B., Voortman, H.G., van Gelder, P.H.A.J.M. & Vrijling, J.K.</i>	889

Volume 2

Theme I: Probabilistic design

Design spectra determination for performance based seismic design <i>Avelar, C., Ayala, A.G. & Díaz de León, A.</i>	899
The JCSS Probabilistic Model Code: Experience and recent developments <i>Chryssanthopoulos, M., Diamantidis, D. & Vrouwenvelder, T.</i>	907
Reliability based comparison of seismic code criteria for plan irregular buildings <i>Rasulo, A., Pintucchi, B.L., Imbimbo, M. & De Stefano, M.</i>	913
An equivalent linearization approach to pushover analysis <i>Díaz-López, O., Fernández-Palafox, M.A. & Esteva, L.</i>	919
Reliability based code calibration - The JCSS approach <i>Faber, M.H. & Sørensen, J.D.</i>	927
Neural networks application in seismic reliability and performance-based design <i>Foschi, R.O. & Zhang, J.</i>	937

Role of simulation in engineering design - An international perspective <i>Haldar, A. & Marek, P.</i>	945
Probabilistic assessment of steel moment connections for seismic regions <i>Hsiao, J.K. & Chambers, J.J.</i>	951
Seismic performance design method based on the reliability theory for steel pier <i>Inomo, H., Goto, H., Shiraki, W. & Dogaki, M.</i>	957
Uncertainty of seismic input and capacity format in performance-based seismic analysis <i>Loh, C-H. & Chung, S-T.</i>	965
An overview of PEER's performance-based earthquake engineering methodology <i>Porter, K.A.</i>	973
Probabilistic framework for performance-based seismic design of wood shearwalls <i>Rosowsky, D.V. & Kim, J.H.</i>	981
Mission and work program of the Joint Committee on Structural Safety <i>Vrouwenvelder, T., Faber, M.H. & Chryssanthopoulos, M.</i>	989
 <i>Theme J: Risk-based optimal design</i>	
Reliability-based design of a marine platform in mexico <i>De León, D. & Ang, A.H-S.</i>	997
Efficiency of genetic algorithms for optimal structural design considering convex models of uncertainty <i>Ganzerli, S., DePalma, P., Smith, J.D. & Burkhart, M.F.</i>	1003
On the stochastic optimization problems of plastic metal working processes <i>Gitman, M.B.</i>	1011
Response surface methods for optimization under uncertainty <i>Igusa, T. & Wan, Z.</i>	1017
Reliability-based optimization of cylindrically shaped shell trusses <i>Jendo, S. & Kolanek, K.</i>	1025
Optimal design of infrastructure facilities subject to deterioration <i>Kübler, O. & Faber, M.H.</i>	1031
Optimization of the target failure probabilities for port structures <i>Nagao, T., Moriya, Y. & Washio, T.</i>	1041
Successive approximations for the solution of optimal design problems with probabilistic objective and constraints <i>Royset, J.O., Der Kiureghian, A. & Polak, E.</i>	1049
Structural safety for temporary loading conditions <i>Sexsmith, R.G.</i>	1057
Optimal reliability targets making use of the Life Quality Index <i>Streicher, H. & Rackwitz, R.</i>	1063
Optimum seismic reliability derived for dual limit states <i>Takada, T. & Yamaguchi, K.</i>	1071
 <i>Theme K: Maintenance and inspection</i>	
Optimal inspection scheduling with alternative fatigue reliability formulations for steel bridges <i>Chung, H.Y., Manuel, L. & Frank, K.H.</i>	1079

Updating the reliability of engineering structures using visual inspection results <i>Estes, A.C., Frangopol, D.M. & Foltz, S.D.</i>	1087
Adaptive optimization of infrastructure maintenance and inspection decisions under performance model uncertainty <i>Guillaumot, V.M., Durango, P.L., Madanat, S.M.</i>	1093
Condition indicators for inspection and maintenance planning <i>Malioka, V. & Faber, M.H.</i>	1101
Optimal maintenance management of bridge structures using adaptive Genetic Algorithm <i>Nakahara, K., Furuta, H., Kameda, T. & Takahashi, Y.</i>	1109
Condition-reliability-cost interaction in bridge maintenance <i>Neves, L.C., Frangopol, D.M. & Hogg, V.</i>	1117
Modeling dependency in inspection performance <i>Straub, D. & Faber, M.H.</i>	1123
 <i>Theme L: Concrete and wood structures</i>	
Lifetime reliability and maintenance of timber utility poles <i>Foliente, G.C., Hähnel, A., Wang, X. & Wang, C.H.</i>	1133
A probabilistic creep and fatigue model for timber materials <i>Köhler, J. & Faber, M.H.</i>	1141
Probabilistic fiber element modeling of reinforced concrete columns <i>Lee, T-H. & Mosalam, K.M.</i>	1149
Risk analysis of light-frame wood construction subjected to extreme winds <i>Li, Y. & Ellingwood, B.R.</i>	1157
An advanced engineering software for probabilistic-based assessment of concrete structures using non-linear fracture mechanics <i>Pukl, R., Červenka, V., Strauss, A., Bergmeister, K. & Novák, D.</i>	1165
Reliability based assessment of prestressed concrete structures subject to creep - Application to a bridge <i>Raphael, W., Mohamed, A., Lemaire, M., Favre, J-L., Calgaro, J-A. & Peyrac, P.</i>	1173
Reliability as a hindcasting tool: Assessment of vulnerabilities of woodframe construction in the United States <i>Rosowsky, D.V.</i>	1179
Effect of load duration on timber structures in Denmark <i>Sørensen, J.D., Stang, B.D. & Svensson, S.</i>	1185
 <i>Theme M: Geoengineering</i>	
Geostatistical methods in site characterization <i>Baise, L.G. & Higgins, R.B.</i>	1195
Probabilistic analysis of liquefaction models of soil layers subjected to seismic loading <i>Blázquez, R. & López-Querol, S.</i>	1203
Influence of the spatial variability on the slope stability of mainly cohesive deposits <i>Bolle, A.</i>	1211
Foundation safety and geotechnical uncertainties: Combined use of drilling parameters and pressuremeter tests <i>Breysse, D. & Moussoutegy, N.</i>	1217

Application of Monte Carlo simulations for calculating the probability of local avalanche <i>Burlet, J.L., Boissier, D. & Gourvès, R.</i>	1223
A probabilistic model for CPT-based soil classification <i>Cetin, K.O. & Ozan, C.</i>	1231
Differential settlement prediction via reliability analysis approach <i>Cherubini, C. & Vessia, G.</i>	1235
Criteria for comparing computed and observed results in geotechnical engineering <i>Cherubini, C. & Orr, T.L.L.</i>	1243
Uncertainty in pressuremeter test results in the presence of geologic anomaly <i>Denis, A. & Houy, L.</i>	1249
Probabilistic modeling of plane failure in rock slopes <i>Düzgün, H.S.B., Yüçemen, M.S. & Karpuz, C.</i>	1255
A slope stability model for spatially random soils <i>Fenton, G.A., Griffiths, D.V. & Urquhart, A.</i>	1263
Reliability analysis of a strip footing designed against settlement <i>Fenton, G.A., Zhou, H., Jaksa, M.B. & Griffiths, D.V.</i>	1271
Random set uncertainty analysis in a combined slope hydrology/stability model <i>Hall, J., Rubio, E. & Anderson, M.</i>	1279
A framework for quantifying the reliability of geotechnical investigations <i>Jaksa, M.B., Kaggwa, W.S., Fenton, G.A. & Poulos, H.G.</i>	1285
Comparison of trend surface analysis, geostatistics, and neural network in site characterization <i>Jiang, T., Juang, C.H., Yuan, H. & Christopher, R.A.</i>	1293
Probabilistic identification of unstable wedges in rock excavations <i>Jiménez-Rodríguez, R. & Sitar, N.</i>	1301
Non-linear seismic responses of SSI systems with uncertainty <i>Kawano, K., Ando, T., Kimura, Y. & Iida, T.</i>	1309
Importance of spatial and temporal variability in the analysis of seismically-induced slope deformation <i>Kim, J. & Sitar, N.</i>	1315
Probability-based assessment of liquefaction risk potential <i>Lee, D.H., Ku, C.S., Yuan, H. & Juang, C.H.</i>	1323
Seismic liquefaction triggering correlations within a Bayesian framework <i>Moss, R.E.S., Cetin, K.O. & Seed, R.B.</i>	1331
Influence of spatial variability and uncertainty evaluation on reliability analysis of a single pile <i>Ng, I.T.</i>	1337
Gaussian and Non-Gaussian random field simulation of permeability for advection and dispersion analysis <i>Nishimura, S. & Fujii, H.</i>	1343
Evaluation of model uncertainties for reliability-based foundation design <i>Phoon, K-K. & Kulhawy, F.H.</i>	1351
Fragility curves for bearing capacity of heterogeneous soils <i>Popescu, R., Deodatis, G. & Nobahar, A.</i>	1357
Reliability of roughened rock shear socket capacity <i>Prakoso, W.A. & Kulhawy, F.H.</i>	1365
Risk assessment of slope stability <i>Rahhal, M.E., Germani, M. & Sherfane, J.</i>	1371

Neurofuzzy networks applied to settlement of shallow foundations on granular soils <i>Shahin, M.A., Jaksa, M.B. & Maier, H.R.</i>	1379
Design formula for the shaft resistance of a pile considering both the number and variability of load test data <i>Shirato, M., Suzuki, M., Matsui, K. & Fukui, J.</i>	1385
Case studies on assessment of global landslide risk in Hong Kong <i>Shiu, Y.K. & Cheung, W.M.</i>	1393
Probabilistically-based estimates of seismic slope displacements <i>Travasariou, Th. & Bray, J.D.</i>	1401
Stochastic analysis of slope stability considering uncertainty of soil-water retention characteristics <i>Tung, Y-K. & Chan, G.C.C.</i>	1409
Determining compression index using multiple regression <i>Yoon, G.L., Kim, B.T. & Jeon, S.S.</i>	1415
Importance of considering correlations among parameters of soil-water characteristic curve <i>Zhang, L.L., Zhang, L.M. & Tang, W.H.</i>	1423
Errors in calculating hydrodynamic pressures for stability analysis of soil slopes subject to rainfall <i>Zhang, L.M., Zheng, Y.R. & Wang, J.L.</i>	1431
 <i>Theme N: Earthquake engineering</i>	
Probabilistic assessment of building response during earthquakes <i>Aslani, H. & Miranda, E.</i>	1441
Probability density function of the peak ground acceleration due to the seismic action <i>Ceccoli, C., Trombetti, T., Silvestri, S. & Gasparini, G.</i>	1449
Statistical characterization of the seismic action in terms of PGA and PGV: Comparison of two methods of calculation <i>Ceccoli, C., Trombetti, T., Silvestri, S. & Gasparini, G.</i>	1457
Ground motion intensity measures for performance-based earthquake engineering <i>Conte, J.P., Pandit, H., Stewart, J.P. & Wallace, J.W.</i>	1465
The design of linear and non-linear seismic base-isolator systems performed by the power flow analysis <i>Falsone, G. & Ferro, G.</i>	1473
Comparison of ground motion intensity measures using the incremental dynamic analysis <i>Giovenale, P., Ciampoli, M. & Jalayer, F.</i>	1483
A special application of non-linear dynamic analysis procedures in probability-based seismic assessments in the region of global dynamic instability <i>Jalayer, F. & Cornell, C.A.</i>	1493
Study on earthquake disaster mitigation based on fluctuation of snowfalls and snow depth at Niigata Prefecture in Japan <i>Kimura, T., Kanda, J., Mitsuhashi, H. & Kobayashi, S.</i>	1501
Sensitivity of seismic demand of a reinforced concrete shear-wall building <i>Lee, T-H. & Mosalam, K.M.</i>	1511
Probabilistic evaluation of assessment rules for the separation distance between adjacent structures <i>Lopez Garcia, D.</i>	1519
Evaluation of maximum drift demands for the seismic performance assessment of frames <i>Medina, R.A. & Krawinkler, H.</i>	1527

Probabilistic evaluations of seismic motion amplification with mean S-wave velocities <i>Nagao, T., Iwata, N., Ishida, M. & Konno, K.</i>	1537
Is it convenient to retrofit structures for earthquake protection? <i>Nuti, C. & Vanzi, I.</i>	1545
An improved measure of ground motion severity for short period structures under severe pulse-type ground motions <i>Sasani, M. & Crawford, J.</i>	1551
Simplified measurement system and an identification procedure of strong ground motion using security video records <i>Sutoh, A., Hoshiya, M., Hori, M. & Saito, Y.</i>	1559
Probabilistic study of peak floor acceleration demands in linear structures <i>Taghavi, S. & Miranda, E.</i>	1565
The role of fragility assessment in consequence-based engineering <i>Wen, Y.K. & Ellingwood, B.R.</i>	1573
Estimating the probability of structural failure using energy approach <i>Wong, K.K.F. & Wang, Z.</i>	1581
 <i>Theme O: Wind engineering</i>	
POD in reduced order modeling of dynamic load effects <i>Chen, X. & Kareem, A.</i>	1591
Stochastic field modeling of ground surface roughness for estimation of strong wind speed profile <i>Itoi, T. & Takada, T.</i>	1599
Measured wind turbine loads and their dependence on inflow parameters <i>Manuel, L., Nelson, L.D., Sutherland, H.J. & Veers, P.S.</i>	1607
Using probabilistic models in wind turbine design <i>Moriarty, P.J. & Holley, W.E.</i>	1615
Probabilistic analysis of extreme loads for design of wind turbine components <i>Pandey, M.D. & Sutherland, H.J.</i>	1623
 <i>Theme P: Bridges and special structures</i>	
Probabilistic analysis of bridge networks based on system reliability and Monte Carlo simulation <i>Akgül, F. & Frangopol, D.M.</i>	1633
Modeling the variability of soils and structural pathology of sewer networks <i>Breyse, D., Laurent, H., Alain, D., Halidou, N. & Elachachi, S.M.</i>	1639
Reliability analysis of impacts due to road vehicles <i>Holický, M. & Markova, J.</i>	1645
Effect of material properties on the reliability of concrete structures <i>Kaszynska, M. & Nowak, A.S.</i>	1651
First passage failure of cable stayed bridge under random ground motion <i>Khan, R.A., Datta, T.K. & Ahmad, S.</i>	1659
Reliability analysis and design of PSC railtrack sleepers <i>Menon, G.K.D. & Nair, K.K.</i>	1667
Extreme thermal response of concrete bridge: Experiment versus design <i>Li, D., Maes, M.A & Dilger, W.H.</i>	1675

Safety evaluation of the upper structure of bridge based on concrete nondestructive tests <i>Liu, P-L. & Kuo, C-Y.</i>	1683
Risk analysis of wedge joint temporary structures during construction <i>Ohdo, K., Takanashi, S., Hino, Y. & Phongkumsing, S.</i>	1689
Risk to old bridges due to ship impact on German inland waterways <i>Proske, D., Weiland, S. & Curbach, M.</i>	1695
Reliability of jacket platforms submitted to through cracks <i>Schoefs, F., Rguig, M. & Rouhan, A.</i>	1703
Reduction of safety factor for cables in design of long-span suspension bridges based on simple reliability optimization of structural system <i>Sugiyama, T.</i>	1711
Reliability analysis for bridge substructures <i>Szwed, A., Nowak, A.S., Withiam, J.L. & Cushing, A.G.</i>	1717
Perspectives on probabilistic risk assessment of concrete gravity dams <i>Tekie, P.B. & Ellingwood, B.R.</i>	1725
Joint use of instrumentation and probabilistic modeling applied to a container wharf <i>Verdure, L., Casari, P. & Wielgosz, C.</i>	1733
Comparative study on probabilistic deformations with failure probabilities of caisson type breakwaters <i>Washio, T., Nagao, T. & Moriya, Y.</i>	1741
Walking safety and slipperiness of wooden footbridges: What are the key parameters? <i>Yotte, S., Breysse, D., Lanvin, J.D., Gayet, J., Cagnard, C., Jay, A., Levecque, G., Testu, S. & Cosolo, S.</i>	1749
