

Proceedings of the International Seminar on Geotechnics in Pavement and Railway  
Design and Construction, Athens, Greece, 16 - 17 December 2004

# GEOTECHNICS IN PAVEMENT AND RAILWAY DESIGN AND CONSTRUCTION

*EDITED BY*

**A. GOMES CORREIA**

*Department of Civil Engineering, University of Minho,  
Guimarães, Portugal*

**&**

**A. LOIZOS**

*Department of Transportation, Planning and Engineering,  
National Technical University of Athens, Greece*

MILLPRESS ROTTERDAM NETHERLANDS 2004

## Table of contents

|         |    |
|---------|----|
| Preface | IX |
|---------|----|

### *KEYNOTE LECTURES*

|  |    |
|--|----|
| Innovative methods and technologies in earthworks<br><i>H. Brandl</i>  | 3  |
| Evaluation of mechanical properties of unbound granular materials for pavements and rail tracks<br><i>A. Gomes Correia</i> | 35 |
| Design considerations for pavement and rail track foundations<br><i>S.F. Brown</i>   | 61 |

### *INVITED LECTURES*

|  |     |
|--|-----|
| Subgrade and unbound materials in highway and airport pavement engineering<br><i>A. Loizos</i>   | 75  |
| Computational issues for geotechnical aspects of pavements and rail beds<br><i>C.W. Schwartz</i>   | 85  |
| Operational devices for compaction optimization and quality control<br>(Continuous Compaction Control & Light Falling Weight Device)<br><i>D. Adam &amp; F. Kopf</i> | 97  |
| Large motorway projects in Greece: the management of geotechnics in the Egnatia Odos project<br><i>S. Lambropoulos</i>   | 107 |
| Geotechnical aspects for high-speed railways<br><i>H. Brandl</i>   | 117 |

### *ACCEPTED LECTURES*

|   |     |
|---|-----|
| Dynamic stiffness and damping ratio of compacted soils<br><i>Th. Tika, P. Kallioglou, G. Koninis &amp; K. Pitilakis</i> | 135 |
| Correlations for soil bearing capacity parameters<br><i>A. Mouratidis</i>   | 143 |

|  |     |
|--|-----|
| Influence of capping layer on stress and strain condition of the road pavement system<br><i>C. Capitanu, G. Fodor &amp; C. Damian</i>                  | 149 |
| Practical developments for pavement foundation specification<br><i>P. Gilbert</i>  | 157 |
| Sub-base reinforcement for the foundation of pavements: performance evaluation and design procedures<br><i>C.D. Hall</i>                               | 167 |
| Opportunities for pavement design through performance-based end-product specifications for foundations<br><i>B. Chaddock, D. Merrill &amp; M. Nunn</i> | 175 |
| Piled embankments for railroads: short overview of methods and significant case studies<br><i>D. Alexiew</i>   | 181 |
| Landslide in Malakassa area: encountering works and rehabilitation of P.A.T.H.E.-Motorway<br><i>A. Polakis &amp; E. Alevra</i>                         | 193 |
| A laboratory investigation into the effectiveness of a geocomposite as sand blanket replacement<br><i>G. Ghataora, M. Burrow &amp; N. Matson</i>       | 201 |
| Analytical track substructure design<br><i>M. Burrow, G. Ghataora &amp; D. Bowness</i>   | 209 |
| Design, construction and maintenance or organization of a modern railway track<br><i>K.S. Giannakos</i>  | 217 |
| The quality of the railway track in relation to the bedding module<br><i>K. Liberis</i>  | 225 |
| Rail track foundations in mining site areas<br><i>K.Kłosek</i>   | 233 |
| <br><i>INDICES</i>   |     |
| Keyword index  | 241 |
| Author index   | 243 |
