

# Table of contents

## ***Papers Session 1***

The impact of agriculture and other land uses on emissions of methane and nitrous and nitric oxides  
*K. Smith*

Precise soil management as a tool to reduce N<sub>2</sub>O and CH<sub>4</sub> emissions from agricultural soils:

Literature review

*J. Mosquera & M.A. Hilhorst*

Effect of soil compaction and fertilization on N<sub>2</sub>O and CH<sub>4</sub> fluxes from agricultural arable soils in the Netherlands

*J. Mosquera, M.A. Hilhorst, J.W.H. Huis in 't Veld & J.M.G. Hol*

Agricultural N<sub>2</sub>O and CH<sub>4</sub> Emission Study after NCGG-3 in China

*E. Lin & L. Guo*

Soil nitrous oxide emissions from rainfed wheat in SE Australia

*F. Barker-Reid, W.P. Gates, K. Wilson, R. Baigent, I.E. Galbally, C.P. Meyer, I.A. Weeks, R.J. Eckard*

Nitrous oxide emissions from soils: "From the bottle to the model"

*P. Boeckx & O. Van Cleemput*

Simultaneous examination of nitrous oxide emissions in grazed pastures using paddock-scale measurements and process-based models

*S. Sagar, M. Harvey, D.L. Giltrap, A.K. Metherell & R.M. Andrew*

A study of Environmental and Management Drivers of Non-CO<sub>2</sub> Greenhouse Gas Emissions in Australian Agro-Ecosystems

*I. Galbally, M. Meyer, S. Bentley, I. Weeks, R. Leuning, K. Kelly, F. Phillips, F. Barker-Reid, W. Gates, R. Baigent, R. Eckard & P. Grace*

Nitrogen cycling and trace gas (N<sub>2</sub>O & CH<sub>4</sub>) fluxes in dry tropical leguminous agro-ecosystem in central India

*V.P. Singh, K. Kaur, P. Dass, S.K. Billore, P.K. Gupta & D.C. Parashar*

Mapping agricultural land cover and land use for Europe

*R. Köble, A. Leip & M. Kempen*

## ***Posters Session 1***

A dynamic approach for evaluating farm-specific as well as general policies to mitigate methane emissions by dairy cows

*A. Bannink, J. Dijkstra, J. Mills, E. Kebreab & J. France*

Simulating nitrous oxide emissions by Water and Nitrogen Management Model (WNMM) with three gas modules

*D. Chen, Y. Li, R. Edis & Y. Zhang*

Spatial variability of N<sub>2</sub>O emissions and contributing soil factors from an Australian irrigated dairy pasture

*D. Chen, D. Turner, Y. Li, R. Edis, K. Kelly, I. Galbally & R. Leuning*

Estimates of methane emission from Chinese rice paddies by linking GIS databases to CH<sub>4</sub>MOD

*W. Zhang, Y. Huang, X. Zheng, S. Han & Y. Yu*

Greenhouse gas generation from livestock waste composting

*T. Osada, Y. Fukumoto, T. Tamura, M. Shiraiha & M. Ishibashi*

Initial study on evaluating N-gas emissions from Chinese cropland by nitrogen balance model IAP-N

*S. Han, X. Zheng & M. Wang*

Nitrous oxide emissions from grazed perennial pastures in New Zealand

*S. Sagar, D.L. Giltrap, C. Li, C.B. Hedley, S.M. Lambie & K.R. Tate*

N<sub>2</sub>O-production during gross nitrification in three differently treated sites of the long-term experiments of Bad Lauchstädt

*C.F. Stange & O. Spott*

## ***Papers Session 2***

Recent research progress on the significance of aquatic systems for indirect agricultural N<sub>2</sub>O emissions

*R. Well & D. Weymann*

Indirect nitrous oxide emissions: Revised emission factors

*D.S. Reay, K.A. Smith, A.C. Edwards, K.M. Hiscock, L.F. Dong & D.B. Nedwell*

New estimates of global emissions of N<sub>2</sub>O from rivers, estuaries and continental shelves

*C. Kroeze, E. Dumont & S.P. Seitzinger*

Indirect nitrous oxide emissions from the Netherlands

*H.A.C. Denier van der Gon, A. Bleeker, T. Ligthart, P.J. Kuikman, J.W. van Groenigen, W. Hamminga,*

*C. Kroeze, H.P.J. de Wilde & A. Hensen*

Nitrous oxide emission from water-logged hillslope soils in the Black Forest (Germany): Measurements and 2D modelling

*M. Lamers, J. Ingwersen & T. Streck*

Acid sulfate soils: A new source of sulfur and greenhouse gases

*O.T. Denmead, B.C.T. Macdonald, I. White, R. Reilly, A. Kinsella, M.D. Melville, D.W.T. Griffith & G. Bryant*

## ***Posters Session 2***

The impact of land use change on methane profiles in peatlands in Southern Germany

*B.S. Holl, S. Fiedler & K. Stahr*

Nitrous oxide and methane emissions under land-use change from extensive grassland to *Eucalyptus globulus* and *Pinus radiata* plantations in Australia

*S. Livesley & S. Arndt*

### ***Papers Session 3***

Emission of non CO<sub>2</sub> greenhouse gases from landfills of different age located in Central Italy

*M. Maione, J. Arduini, M. Rinaldi, F. Mangani & B. Capaccioni*

Establishing HFC use-phase emission rates of mobile air conditioners in passenger cars

*W. Schwarz, J. Harnisch, A. Koppenol & M. Vainio*

GHG-emissions of Russian natural gas industry by gas export to Europe

*S. Lechtenboehmer, C. Dienst, M. Fishedick, T. Hanke, G. Akopova, N. Gladkaja & S. Assonov*

N<sub>2</sub>O emissions from HNO<sub>3</sub> production in the Czech Republic

*P. Fott, B. Bernauer & M. Markvart*

### ***Posters Session 3***

Emission of greenhouse gases from the Spanish waste management system

*J.M. Baldasano, G. Ferey & P. Jiménez*

### ***Papers Session 4***

The quality of european (EU-15) Greenhouse Gas inventories from agriculture

*A. Leip*

Using national emission inventories to determine global anthropogenic emissions: Results, limitations and advantages

*J.M. Mangino, S. Fim & E.A. Scheehle*

Towards reconciling national emission inventories with the global budget for methane

*K.R. Lassey, E.A. Scheehle & D. Kruger*

Improvement of uncertainty due to improvements of the Netherlands' Greenhouse Gas inventory?

*L.J. Brandes, J.G.J. Olivier & H.H.J. Vreuls*

Long-term scenarios for black and organic carbon emissions

*S. Rao, K. Riahi, K. Kupiainen & Z. Klimont*

### ***Posters Session 4***

Contribution to the development of Benin-specific emission factors for land transport

*G.H.S. Guendehou*

How will the contribution of agriculture to anthropogenic greenhouse gas emissions develop?

An analysis of Western and Central-Eastern national GHG inventories

*A. Leip & J. Ulrich*

### ***Papers Session 5***

Tropospheric ozone and its precursors: Reanalysis over the past 45 years and projections for 2030

*T. van Noije & P. van Velthoven*

Model estimations of Siberian strong fires effect on atmospheric composition and regional climate during 2002-2003 warm periods

*A.A. Kiselev & I.L. Karol*

## **Posters Session 5**

Influence of the Antarctic Oscillation on the total ozone content in the Southern Hemisphere

*A.V. Glushkov, V.N. Khokhlov & N.S. Loboda*

## **Papers Session 6**

Observational constraints on the global methane budget

*E.J. Dlugokencky, S. Houweling, K.A. Masarie & P.M. Lang*

Variations in trends in global methane concentrations, 1978-2005: Six years of very slow net global atmospheric methane growth

*F.S. Rowland, I.J. Simpson, S. Meinardi & D.R. Blake*

Overview of methane variability over continental Russia (TROICA expeditions)

*O.A. Tarasova, C.A.M. Brenninkmeijer, S.S. Assonov & N.F. Elansky*

Recent trends in global greenhouse gas emissions: Regional trends and spatial distribution of key sources

*J.G.J. Olivier, J.A. van Aardenne, F. Dentener, L. Ganzeveld & J.A.H.W. Peters*

The role of methane in ozone controls: Implications for the next decades

*F. Dentener, D. Stevenson & J. Cofala*

Simulation of methane concentration and carbon isotopic composition using a global atmospheric transport model

*T. Saeki, S. Maksyutov & T. Nakazawa*

The role of geological sources in the atmospheric methane budget: A reappraisal

*G. Etiope*

## **Posters Session 6**

Results of CH<sub>4</sub> measurements near Saint-Petersburg (Russia) – urban source and regional characteristics

(Meth-MonitEUr Project)

*A.I. Reshetnikov, V.I. Privalov, N.N. Paramonova, A.V. Zinchenko & S.V. Jagovkina*

Modelling the soil consumption of atmospheric methane

*C.L. Curry & D. van der Kamp*

Diurnal and seasonal variations of atmospheric methane in northern Finland

*T. Aalto, M. Lallo, J. Hatakka, T. Laurila & Y. Viisanen*

## **Papers Session 7**

Improved continuous *in situ* measurements of C<sub>1</sub>-C<sub>3</sub> PFCs, HFCs, HCFCs, CFCs and SF<sub>6</sub> in Europe and Australia

*B.R. Grealley, P.G. Simmonds, S. O'Doherty, A. McCulloch, B.R. Miller, R.F. Weiss, P.K. Salameh, J. Mühle,*

*T. Tanhua, P.J. Fraser, P.B. Krummel, B.L. Dunse, L.W. Porter & R.G. Prinn*

Surface measurements show a 17% increase in the release of sulfur-hexafluoride (SF<sub>6</sub>) to the atmosphere in 2003

*W. Peters, E. Dlugokencky, J. Olivier, G. Dutton & K. Smythe*

Assessment of the impact of SF<sub>6</sub> and PFCs Reservoir tracers on global warming, the AEOLOS study

*D. Vlachogiannis, A. Sfetsos, A. Stubos, R. E. P. Sotiropoulou, E. Tagaris, C. Pilinis, W. Zhong,*

*J. D. Haigh, D. O. Eriksen, S. Hartvig, C. Chatzichristos, J. Muller & R. Kleven*

Reductions of SF<sub>6</sub> emissions from high and medium voltage electrical equipment in Europe

*S. Wartmann & J. Harnisch*

## **Posters Session 7**

Seven years (1997-2004) record of CFC's concentration measurements in the air of Krakow, Poland

*I. Sliwka, J. Lasa, M. Jackowicz-Korczynski & I. Grombik*

In situ monitoring of HFCs, PFCs, SF<sub>6</sub>, CFCs and HCFCs at a remote station in East Asia

*Y. Yokouchi, H. Mukai, T. Saito, T. Shirai & S. Taguchi*

## **Papers Session 8**

Evaluation of tropospheric trends of primary and secondary greenhouse gases over Europe from ground-based remote sensing observations and model analyses

*M. De Mazière, C. Vigouroux, T. Gardiner, M. Coleman, P. Woods, K. Ellingsen, M. Gauss, I. Isaksen, T. Blumenstock, F. Hase, I. Kramer, C. Camy-Peyret, P. Chelin, E. Mahieu, P. Demoulin, P. Duchatelet, J. Mellqvist, A. Strandberg, V. Velazco, J. Notholt, R. Sussmann, W. Stremme & A. Rockmann*

Evolution of a dozen non-CO<sub>2</sub> greenhouse gases above Central Europe since the mid-1980s

*R. Zander, E. Mahieu, P. Demoulin, P. Duchatelet, C. Servais, G. Roland, L. Delbouille, M. De Mazière & C.P. Rinsland*

## **Papers Session 9**

Integrated assessment of climate change with reduction of methane emissions

*A. van Amstel*

Trade-off between CO<sub>2</sub> and CH<sub>4</sub> under conditions of uncertainty, learning and inertia

*D.J.A. Johansson, U.M. Persson & C. Azar*

Non-CO<sub>2</sub> Greenhouse Gases in national climate policies: A reassessment of the comprehensive approach

*D.A. Johansson & U.M. Persson*

Methane, nitrous oxide and fluorinated gases in the Greenhouse & Air pollution INformation and Simulation (GAINS) model

*W. Winiwarter, L. Höglund-Isaksson, A. Tohka, R. Mechler, G. Klaassen & M. Amann*

The implementation context for non-CO<sub>2</sub> greenhouse gas measures exemplified for anaerobic co-digestion of manure in Europe

*M.J.A. Tijmensen & S.T.P. van Dun*

Environmental assessment of cooling applications with a simplified life cycle approach

*M. Hekkenberg, J. Potting, A.J.M. Schoot Uiterkamp & D. de Jager*

Integrated assessment of future pollution of air, soil and water by agriculture:

The implications for non-CO<sub>2</sub> greenhouse gases

*M. Havlikova & C. Kroeze*

Productivity factors and international Marginal Abatement Costs for methane

*M. Gallaher, J. Petrusa, M. Ross & C. Delhotal*

Role of government policies and regulation in curbing the emissions of non-CO<sub>2</sub>-greenhouse gases in the Netherlands

*M. Harmelink, K. Blok & R. Flipphi*

Non-CO<sub>2</sub> GHG emissions in India: Emission trends and mitigation flexibility

*R. Nair, P.R. Shukla, Y. Matsuoka, M. Kainuma & G. Hibino*

## ***Papers Session 10***

Comparing the costs of abatement for the non-CO<sub>2</sub> greenhouse gases in the industrial sector

*J. Gale, D. Pape & A. Sankowski*

Key findings of IPCC/TEAP's Special Report on "Safeguarding the ozone layer and the global climate system: Issues related to hydrofluorocarbons and perfluorocarbons"

*D. de Jager & L.A. Meyer*

International Marginal Abatement Costs of non-CO<sub>2</sub> greenhouse gases

*M. Gallaher, J. Petrusa & C. Delhotal*

Costs, cost-effectiveness and emission reductions of non-CO<sub>2</sub> greenhouse gases: Achievements and expectations for the Netherlands

*M. Harmelink, K. Blok & G.H. ter Avest*

Least cost abatement of greenhouse gases in the Greenhouse & Air pollution INformation and Simulation (GAINS) model

*L. Höglund-Isaksson F. Wagner, G. Klaassen, A. Tohka, W. Winiwarter, C. Berglund & M. Amann*

The market potential of large-scale non-CO<sub>2</sub> CDM projects

*A. Michaelowa, J. Buen, A. Eik & E. Lokshall*

## ***Posters Session 10***

Multi-gas emission pathways for stabilizing greenhouse gas concentrations

*M.G.J. den Elzen & M. Meinshausen*

Modeling investment decisions and Marginal Abatement Costs for methane

*M. Gallaher, J. Petrusa, M. Ross & C. Delhotal*

Responsible use of HFCs as ODS replacements in refrigerator applications

*R.W. Johnson*

## ***Papers Session 11***

The impact of potential nitrous oxide mitigation strategies on the environmental and economic performance of dairy systems in 4 New Zealand catchments

*C.A.M. de Klein & R.M. Monaghan*

Does afforestation of pastures with pine trees reduce net emissions of methane in New Zealand?

*K.R. Tate, S. Sagar, C.B. Hedley, J. Dando, S.J. Price & G. Rys*

Estimates of joint soil carbon, methane and N<sub>2</sub>O marginal mitigation costs from world agriculture

*B. DeAngelo, S. Rose, C. Li, W. Salas, R. Beach, T. Sulser & S. Del Grosso*

## ***Posters Session 11***

Simulation of management practices impacts on GHG emissions from agricultural soil

*Y. Li, X. Qin, Q. Gao, Y. Wan & X. Wei*

Mitigating nitrous oxide emissions from urine patches

*J.W. van Groenigen, D.M. Kool, G.L. Velthof & P.J. Kuikman*

## ***Papers Session 12***

Risks and benefits of fluorinated greenhouse gases in processes and products

*J. Harnisch, N. Höhne, M. Koch, S. Wartmann, W. Schwarz, W. Jenseit, U. Rheinberger, P. Fabian & A. Jordan*

Separation process of HFCs and SF<sub>6</sub> from the gaseous mixtures with nitrogen by the surface diffusion mechanism through porous inorganic membranes

*K. Shiojiri, Y. Yanagisawa, A. Yamasaki & F. Kiyono*

The Methane to Markets Partnership: An international framework to advance the recovery and use of methane as a clean energy source

*P.M. Gunning*

New developments in international and US Programs for PFC reductions in aluminium

*J. Marks, R. Chase & S.D. Rand*

Good Practice Guidance for industrial refrigeration

*M. Verwoerd, J. Mieog, A. Koppenol & M. Dieleman*

Comparative efficiencies and implications for greenhouse gas emissions of chiller refrigerants

*J.M. Calm*

Fruit preservation with natural refrigerants: Frigotronic® as a possible solution for medium size industrial refrigeration appliances

*E. Hogendoorn & E. Dijkstra*

Global F-gas emissions scenarios and the evaluation of potential reductions

*T. Hanaoka, M. Kainuma & Y. Matsuoaka*

Addressing aerosol emissions from metered dose inhalers: The interface of environmental and health policies

*P. Wright*

N<sub>2</sub>/SF<sub>6</sub> mixtures as replacement for pure SF<sub>6</sub> in HV gas-insulated systems

*S. Meijer & W.R. Rutgers*

Philips Semiconductors policy and strategy to reduce global warming by PFC emissions

*H. Thewissen, J. Mohr & E.P. Schat*

Projects for reduction of PFC-emission at Philips Semiconductors

*I. Rink, R. Richters & P. Schumbera*

Major coal mine GHG emission converted to electricity – 1st large scale installation

*R. Mattus*

## ***Posters Session 12***

Emissions scenarios and policy considerations for HFCs in fire protection

*K.T. Werner & J.G. Owens*

Reduction of Non-CO<sub>2</sub> Greenhouse Gas (NCGG) emissions

*A.M. Andersson*

The sensitivity of emission reductions to lead times in sectors with long-lived infrastructure:

A case study focusing on air conditioning and refrigeration

*D.S. Godwin & D. Ottinger Schaefer*

Double micro-pore CoH-FBZ structure for the selectivity reduction of NO by CH<sub>4</sub> in the presence of excess oxygen

*J. Zhang, Y. Liu, W. Fan & R. Li*

Fluorinated greenhouse gases in products and processes: An evaluation of technical measures to reduce greenhouse gas emissions

*K. Schwaab, F. Dettling, D. Bernhardt, C. Elsner, R. Sartorius, K. Reimann, R. Remus & W. Plehn*

Establishing HFC use-phase emission rates of mobile air conditioners in passenger cars

*W. Schwarz, J. Harnisch, A. Koppenol & M. Vainio*
