

Table of contents

Preface	1
Panel Sessions	3
<i>Keynote and Invited Lectures</i>	
Platform wide innovations to overcome thermal challenges <i>R. Yavatkar & M. Tirumala</i>	7
Thermal challenges deriving from the advances of display technologies <i>S.R. Kubota</i>	23
Fundamental limits of heat transfer <i>A. Avila, R.K. Cavin, V.V. Zhirnov & H.H. Hosack</i>	25
Cooling technology using heat pipes and vapor chamber <i>M. Mochizuki, Y. Saito, F. Kiyooka, T.T. Nguyen, T.V. Nguyen & V. Wuttijumnong</i>	33
Thermal challenges for SPARC based microprocessors <i>B. Sen & J. Jones</i>	43
Thermal performance of ALOX high brightness light emitting diode (LED) package <i>S. Gao, J. Hong, S. Choi & S. Yi</i>	51
<i>Technical Sessions</i>	
<i>Transport in Micro- and Nano-thermal Systems</i>	
One-dimensional thin-film phonon transport with generation <i>A. Bulusu & D.G. Walker</i>	61
Transient thermal diffusion analysis on 65nm MOSFET <i>K. Yazawa, T. Kawamura, F. Sugaya, H. Kuroda & S. Furkay</i>	69
Scaling down the size of thermoacoustic devices <i>O.G. Symko</i>	75
Energy minimization-based analysis of electrowetting for microelectronics cooling applications <i>V. Bahadur & S.V. Garimella</i>	81

A CCD thermoreflectance thermography system and its calibration <i>P.L. Komarov, M.G. Burzo & P.E. Raad</i>	91
Thermal characterization of embedded electronic features by an integrated system of CCD thermography and self-adaptive numerical modelling <i>P.E. Raad, P.L. Komarov & M.G. Burzo</i>	101
A comparison of thin film microrefrigerators based on Si/SiGe, superlattices and bulk SiGe <i>Y. Ezzahri, G. Zeng, K. Fukutani, Z. Bian & A. Shakouri</i>	111
Performance potential and challenges of future refrigeration-based electronics cooling approaches <i>L. Cremaschi, E.A. Groll & S.V. Garimella</i>	119
Thermal MEMS for inertial systems <i>D. Zinoviev, V. Andreev, D. Loktev & K. Tuzovsky</i>	129
Transient thermal performance of phase change materials with embedded graphite nanofibers <i>T. Kopec, A.S. Fleischer, R.D. Weinstein & C.A. Bessel</i>	137
 <i>Issues in Microchannel Transport</i>	
Critical heat flux of R-123 in rectangular microchannels <i>A. Koşar & Y. Peles</i>	147
High-performance, low-cost liquid micro-channel cooler <i>R.L. Webb</i>	155
Electronic cooling with sub- and super-critical CO ₂ in microchannels <i>J.C. Davis</i>	163
Force-fed evaporation and condensation utilizing advanced micro-structured surfaces and micro-channels <i>T. Baummer, E. Cetegen, S. Dessiatoun & M. Ohadi</i>	171
Numerical study of laminar heat transfer and pressure drop characteristics in a water-cooled minichannel heat sink <i>X.L. Xie, Y.L. He & W.Q. Tao</i>	179
 <i>Advances in Liquid Cooling</i>	
Heat exchanger design methodology for electronic heat sinks <i>R.L. Webb</i>	189
Flow boiling of FC-72 from a screen laminate extended surface matrix <i>B. Holland, N. Ozman & R.A. Wirtz</i>	197
Microscale analysis of heat transfer in nucleate boiling of FC-72 liquid <i>S. Moghaddam & K.T. Kiger</i>	207
SprayCool™ Compact Server for military shipboard environments <i>A.D. Johnston, D.L. Stone, T. Cader & D.A. Locklear</i>	215
Convection heat transfer in electrostatic actuated liquid droplets for electronics cooling <i>H. Oprins, J. Danneels, B. Van Ham, B. Vandeveldel & M. Baelmans</i>	223
 <i>Heat Pipe Innovations</i>	
Development of a MEMS micro loop heat pipe for electronics cooling <i>A. Shuja, S. Parimi, P. Medis, F.M. Gerner, H.T. Henderson & F.M. Gerner</i>	233

Vaporization heat transfer in sintered copper wicks with micro-grooves in heat pipe evaporators <i>Y. Zhao & C. Chen</i>	241
Multi-evaporator hybrid loop heat pipe for cooling high performance servers <i>W. Zimbeck, J. Yun, J. Cennamo & E. Krolczek</i>	249
An experimental study of a novel high-performance heat pipe for chip cooling of desktop computer <i>X.L. Xie, Y.L. He, W.Q. Tao & H.W. Yang</i>	257
Experimental study on indirect thermosyphon radiator coupled with flat heat pipe for electronic components <i>X. Zhang & G. Ma</i>	263
An experimental investigation on the thermal performance of a flat plate heat pipe spreader <i>M. Zhang, Z.L. Liu & G.Y. Ma</i>	271

Thermal Challenges and Solutions in Small Form Factor Electronics

Mobile thermal challenges in future platforms <i>R.K. Mongia, H. Pokharna & S. Machiroutu</i>	283
Laminar wall jets for skin cooling in low form factor electronics <i>A. Bhattacharya, R.K. Mongia & R. Kamiya</i>	291
Numerical investigation on thermal management of a processor board <i>B. Gao & X.F. Peng</i>	299
Study on the effect of inclination on thermal behaviors of natural convection inside thin electronic equipment casings <i>M. Ishizuka, S. Nakagawa & Y. Kitamura</i>	307

Innovative Air Cooling Techniques

Mixed convection heat transfer and pressure drop of entrance region in an inclined rectangular duct <i>D. Chong, J. Liu, J. Yan & S. Hu</i>	317
Optimization of compact heat exchanger with genetic algorithm considering minimum entropy generation <i>L. Zhang & C. Yang</i>	327
Combined convection-radiation heat transfer from a vertical fin array <i>B. Govinda Rao, V. Dharma Rao, S.V. Naidu, K.V. Sharma & P.K. Sarma</i>	335
Multi-disciplinary design optimization of the Plate Fin Heat Sink <i>C. Yang & J. Zhou</i>	343
Thermal management of automatic teller machine <i>F.L. Tan</i>	351

Advances in System Modeling

Strategies for effective use of exergy-based modeling of data center thermal management systems <i>S. McAllister, V.P. Carey, A. Shah, C. Bash & C. Patel</i>	361
Data center TCO; a comparison of high-density and low-density spaces <i>M.K. Patterson, D.G. Costello, P.F. Grimm & M. Loeffler</i>	369
Improved compact thermal model for studying 3-D interconnect structures with low-k dielectrics <i>A. Whelan, Y. Joshi & W. King</i>	379

Interconnection of subsystem reduced-order models in the electro-thermal analysis of large systems	387
<i>P. Mathai & B. Shapiro</i>	
A technical review of studies on temperature distribution in three dimensional stacked packages	399
<i>A. Desai, J. Geer & B. Sammakia</i>	
Scaling relations for induction heating	409
<i>K.W. French</i>	
Passive or active cooling: a model for fast thermal exploration of electronic product concepts	415
<i>R. Strijk, J.A.G. de Deugd & J.S.M. Vergeest</i>	
 <i>Indices</i>	
Keyword index	425
Author index	427
