

## Table of contents

Preface	XI
Organization	XII
<i>Technical papers</i>	
Stochastic evolution of crystallographic orientation <i>Arwade, S.R. &amp; Grigoriu, M.</i>	3
A probabilistic model for seismic waves' propagation on the territory <i>Baratta, A. &amp; Corbi, I.</i>	13
Statistical analysis of input parameters influence to the tunnel deformations modelling <i>Barták, J., Pruška, J. &amp; Hilar, M.</i>	23
Modeling anisotropic hardening with a stochastic cellular automaton <i>Baxter, S.C. &amp; Reynolds, A.P.</i>	29
Stochastic simulations of a particle in core model for high intensity linacs <i>Bazzani, A., Turchetti, G., Bassi, G. &amp; Mais, H.</i>	37
On the ensemble up-crossing rate approach to time variant reliability analysis of uncertain structures <i>Beck, A.T. &amp; Melchers, R.E.</i>	43
Optimal placement of sensors & shakers for modal identification <i>Bedrossian, H. &amp; Masri, S.F.</i>	53
Stochastic linearization: True, Standard or Gaussian? <i>Bernard, P.</i>	59
Assessment of safety and failure modes for structures under strong seismic and related actions <i>Bolotin, V.V. &amp; Trifonov, O.V.</i>	67
A micro-macro description of the engineering properties of randomly inhomogeneous cement-based composites <i>Boulfiza, M.</i>	73
On some closure methods in nonlinear stochastic dynamics <i>Cacciola, P., Muscolino, G. &amp; Ricciardi, G.</i>	79
On the computation of non geometric spectral moments for non stationary filtered input processes <i>Caddemi, S., Colajanni, P., Duca, I. &amp; Muscolino, G.</i>	89

Simplified stochastic modeling and simulation of unidirectional fiber reinforced composites <i>Camata, G., Corotis, R.B. &amp; Spacone, E.</i>	99
Dynamic analysis of complex systems by Volterra approach <i>Carassale, L. &amp; Kareem, A.</i>	107
An iterative solver for stochastic soil-structure interaction <i>Clouteau, D., Lafargue, R. &amp; Ghanem, R.</i>	119
Noise-controlled parametric bifurcations <i>Davies, H.G.</i>	125
Dynamic testing techniques for qualifying Mars exploration rover equipment to quasi-static landing loads <i>Davis, G.L., Scharton, T.D. &amp; Tsoi, W.B.</i>	131
Dynamic analysis of linear elastic systems in presence of structural uncertainties <i>Di Paola, M., Pirrotta, A. &amp; Zingales, M.</i>	139
Log-characteristic function and cumulants: Pitfall and remedy <i>Di Paola, M. &amp; Ricciardi, G.</i>	149
Nonlinear random vibrations of a suspended cable under wind loading <i>Di Paola, M., Sofi, A. &amp; Muscolino, G.</i>	159
Wind speed estimation uncertainties: Effects of climatological and micrometeorological parameters <i>Diniz, S.M.C., Sadek, F. &amp; Simiu, E.</i>	169
A novel technique for stochastic finite element analysis <i>Falsone, G. &amp; Impollonia, N.</i>	179
About the evaluation of $E[f(X)X]$ when $X$ is a non-Gaussian random variable <i>Falsone, G. &amp; Rundo Sotera, M.</i>	189
A new perspective on polynomial chaos <i>Field Jr, R.V. &amp; Grigoriu, M.</i>	199
Genetic algorithms for optimal structural design using convex models of uncertainties <i>Ganzerli, S. &amp; Burkhart, M.F.</i>	207
Elastic microcracked bodies with random properties: Numerical investigations <i>Gioffrè, M., Stazi, F.L., Mariano, P.M. &amp; Augusti, G.</i>	215
Analysis of random composite materials using non-Gaussian simulation <i>Graham, L., Gurley, K., Masters, F. &amp; Baxter, S.</i>	225
Mixtures of translation random fields <i>Grigoriu, M.</i>	235
WKB-Galerkin method with application to the correlation analysis of stochastic behaviour of non-linear systems with time-depended parameters <i>Gristchak, V.Z. &amp; Lysenko, V.V.</i>	243
Monte Carlo simulation of the hysteretic response of frame structures using plastification adapted shape functions <i>Guggenberger, J., Grundmann, H. &amp; Lin, Y.L.</i>	249
Optimization of life cycle cost cooperated with insurance <i>Hoshiya, M.</i>	259
Dynamic response of linear systems to random trains of non-overlapping pulses with arbitrary shapes <i>Iwankiewicz, R. &amp; Nielsen, S.R.K.</i>	263
Reliability-based optimization of structural systems under multi-loading conditions <i>Jendo, S. &amp; Kolanek, K.</i>	279
A reliability-based optimal design process for dynamic response modification devices <i>Jensen, H.A.</i>	285

MCMC based simulation methodology for reliability calculations <i>Katafygiotis, L. &amp; Cheung, J.S.H.</i>	293
On the calculation of the failure probability corresponding to a union of linear failure domains <i>Katafygiotis, L. &amp; Cheung, J.S.H.</i>	301
Adaptivity and sensitivity for stochastic problems <i>Keese, A. &amp; Matthies, H.G.</i>	311
Fragility curves of concrete bridges retrofitted by column jacketing <i>Kim, S.-H., Shinozuka, M., Feng, M.Q., Yi, J.-H. &amp; Kushiyama, S.</i>	317
Generating samples of two-phase random media <i>Koutsourelakis, S. &amp; Deodatis, G.</i>	325
Control of resonance oscillations in stochastic systems <i>Kovaleva, A.</i>	335
Piecewise stochastic linearization method for random vibration of non-linear oscillators <i>Lacquaniti, S. &amp; Ricciardi, G.</i>	343
Probabilistic approach to wing divergence <i>Laudanski, L.M. &amp; Rykiel, H.</i>	353
Simulation of plastic displacement distributions for multistory shear frames excited by Gaussian white noise <i>Lazarov, B. &amp; Ditlevsen, O.</i>	361
A reliability-based approach for control of floater position in relation to mechanical design criteria <i>Leira, B.J., Sørensen, A. &amp; Larsen, C.M.</i>	371
Strain rate effect on equivalent initial flaw size in a particulate composite material <i>Liu, C.T. &amp; Yang, J.N.</i>	381
Optimal S/N fatigue testing for variable-amplitude and stochastic service loads <i>Lutes, L.D., Sarkani, S., Kihl, D.P. &amp; Beach, J.E.</i>	387
Evaluation of dissipated energy in seismic protected structure by non linear base isolators: A stochastic analysis <i>Marano, G.C. &amp; Greco, R.</i>	395
A novel nonlinear seismic base isolation concept <i>McFarland, D.M., Vakakis, A.F., Bergman, L.A. &amp; Wang, Y.</i>	405
Joint statistics of combined first- and second-order random processes <i>McWilliam, S.</i>	411
Reliability and cost estimation of actively controlled nonlinear structures in consideration of system-device failure <i>Mochio, T.</i>	421
Largest absolute value statistics for the response of linear structures under random excitations <i>Muscolino, G. &amp; Palmeri, A.</i>	431
Numerical calculation of the level crossing rate of second order stochastic Volterra systems <i>Naess, A. &amp; Machado, U.</i>	441
The study of chaotic attractors of nonlinear systems by path integration <i>Naess, A. &amp; Skaug, C.</i>	447
Spectral stochastic finite element method for surface earthquake fault problems <i>Nakagawa, H., Hori, M. &amp; Oguni, K.</i>	455
Optimal instrumentation strategies for structural identification <i>Papadimitriou, C.</i>	463

Stochastic finite element analysis of cylindrical shells with random initial imperfections <i>Papadopoulos, V., Papadrakakis, M. &amp; Stefanou, G.</i>	473
Flutter analysis of a two-dimensional airfoil with a randomly perturbed geometry <i>Poirion, F.</i>	481
Non-Gaussian simulation using Hermite polynomial expansion <i>Puig, B., Poirion, F. &amp; Soize, C.</i>	487
Geotechnical engineering judgment in reliability analysis of slope stability <i>Rahhal, M.E.</i>	497
Reliability of composite laminates by Monte Carlo simulation <i>Recek, S. &amp; Frangopol, D.M.</i>	507
Low-order modeling and forecasting of stock market securities <i>Rediniotis, O.K. &amp; Surendran, A.</i>	513
Identification of non-linear stochastic oscillator with parametric excitation <i>Rüdinger, F. &amp; Krenk, S.</i>	523
On the dynamic stochastic response of FE-models <i>Schenk, C.A., Pradlwarter, H.J. &amp; Schuëller, G.I.</i>	533
Stochastic representation for multiscale materials exhibiting variability <i>Shi, J. &amp; Ghanem, R.</i>	541
A method of inspection scheduling for aircraft fleet with multiple-site fatigue cracks <i>Shoji, H., Shinozuka, M. &amp; Asada, H.</i>	551
A computationally efficient approach for evaluating the response of nonlinear systems subjected to nonstationary stochastic loads <i>Smyth, A.W. &amp; Masri, S.F.</i>	559
Problem of dynamic coefficient in the case of stochastic excitation <i>Sniady, P., Sieniawska, R. &amp; Zukowski, S.</i>	563
Gibbsian probability distribution for random microstructures <i>Sobczyk, K.</i>	569
Random matrix theory and random uncertainties modeling <i>Soize, C.</i>	575
Stochastic dynamic analysis of a spar structure coupled with top tensioned risers and mooring lines <i>Spanos, P., Ghosh, R., Finn, L.D. &amp; Halkyard, J.</i>	583
A procedure for stochastic fatigue analysis of equipment on floating production / storage / offloading structures (FPSO) <i>Spanos, P., Wang, J., Peng, B. &amp; Song, S.</i>	591
Time-variant reliability-oriented structural optimization of series systems <i>Streicher, H. &amp; Rackwitz, R.</i>	599
Comparison of methods for computing the probability of failure in time-variant reliability using the outcrossing approach <i>Sudret, B., Deraux, G., Andrieu, C. &amp; Lemaire, M.</i>	609
Dynamic response of a beam to a random train of moving oscillators by simulation <i>Tellier, L. &amp; Iwankiewicz, R.</i>	619
Optimal design of unanchored fluid-filled tanks to seismic excitation <i>Theodosiou, C., Aichouh, P., Natsiavas, S. &amp; Papadimitriou, C.</i>	627
Development of prediction of machine error by using RBF network <i>Utsunomiya, Y., Arakawa, M., Ishikawa, H., Kimura, N. &amp; Tanaka, Y.</i>	635

Simple handy chaos generator <i>Vanura, T. &amp; Stepanek, P.</i>	643
Dynamics of cars driving on stochastic roads <i>Wedig, W.V.</i>	647
Uncertainty modeling of Burgers' equation by generalized polynomial chaos <i>Xiu, D. &amp; Karniadakis, G.E.</i>	655
Modeling of damage accumulation for duffing-type systems under severe random excitations <i>Yang, B., Mignolet, M.P. &amp; Spottswood, S.M.</i>	663
Stochastic seismic induced hydrodynamic pressure by modal analysis <i>Zingales, M.</i>	675
 <i>Indexes</i>
