

Table of contents

Preface	IX
Acknowledgements	X
<i>Review paper</i>	
Impacts on the development of an optimum design system for welded structures <i>Farkas, J.</i>	3
<i>1 Materials, fatigue of welded joints</i>	
Comparison of methods of fatigue analysis at an example of cruciform fillet welded joints <i>Hobbacher, A.F.</i>	11
Verification of the partial reliability factors on a case of a frame with respecting random imperfections <i>Kala, Z.</i>	19
The statistical correlation of material characteristics - Experimental and theoretical results of rolled steel beam <i>Kala, Z. & Kala, J.</i>	23
Assessment of lamellar tearing resistance of plates for welded structures <i>Kálna, K.</i>	27
Determination of fatigue crack propagation limit curves and one possibility of their application <i>Lukács, J.</i>	33
Structural hot spot stress method for fatigue analysis of welded components <i>Niemi, E.J. & Marquis, G.B.</i>	39
HISTAR - a new generation of high performance steel <i>Weber, L.</i>	45
<i>2 Thin-walled structures</i>	
Buckling of thin-walled columns with open section <i>Edlund, B.L.O.</i>	53
Global and local stability analysis of thin-walled beams <i>Garstecki, A., Kąkol, W. & Rzeszut, K.</i>	61

Buckling analysis of thin-walled compressed members using Generalised Beam Theory and FEM <i>Halme, T.</i>	67
A hybrid stress element for thin-walled beams <i>Oral, S.</i>	75
Non-linear formulation for elastic stability analysis of thin-walled beam-type structures <i>Turkalj, G., Brnic, J. & Lanc, D.</i>	79
<i>3 Tubular structures</i>	
Optimum design of compression struts of circular and square hollow section made of stainless steel <i>Farkas, J. & Jármai, K.</i>	89
Full-scale tests of a space truss roof system <i>Fülöp, A. & Iványi, M.</i>	93
Optimum fatigue design of a uniplanar CHS truss <i>Jármai, K. & Farkas, J.</i>	99
Behaviour of hollow concrete-filled steel tubular members subjected to tension and bending <i>Kvedaras, A.K. & Sharashkinas, V.</i>	105
Employment of layered beam elements for the analyses of steel-concrete composite structural members <i>Leskelä, M.V.</i>	111
Application of forming simulation in the post-buckling analysis of cold-formed stainless steel columns <i>Manninen, T., Korhonen, A.S. & Larkiola, J.</i>	117
Quasi-evolutionary polyoptimization of spatial trusses <i>Paczkowski, W.M., Silicki, A. & Jendo, S.</i>	123
Buckling behaviour of thin-walled steel tubes subjected to flexure <i>Wheeler, A. & Pircher, M.</i>	129
Comparative optimization of trusses with different type of joints <i>Gondos, G.</i>	137
<i>4 Frames</i>	
Earthquake-resistant composite steel-concrete frames: Some constructional considerations <i>Braconi, A., Caramelli, S., Cioni, P. & Salvatore, W.</i>	145
Space frame optimization using continuous solution and simulated annealing <i>Jalkanen, J.</i>	153
Earthquake resistant design of fully restrained beam-to-RHS column connections <i>Kurobane, Y.</i>	159
Developments in standard structural design of steel buildings <i>Papp, F.</i>	169
Overall sensitivity analysis of hot-rolled beam-columns <i>Szalai, J.</i>	177
Optimization of a welded I-section frame with size limitations <i>Timár, I., Horváth, P. & Borbély, T.</i>	183
Numerical modelling of semi-rigid beam-to-column connections <i>Vértes, K. & Iványi, M.</i>	189
Cyclic behaviour of connections with end-plate <i>Yorgun, C.</i>	193

<i>5 Plates and shells</i>	
Utilization of the in-plane stiffness of sandwich panels <i>Aalto, J. & Hassinen, P.</i>	201
Minimum cost design of uniaxially compressed plates with welded trapezoidal stiffeners considering a reliability constraint <i>Jármai, K., Farkas, J. & Simões, L.C.</i>	209
Minimum cost design of horizontal vessels on saddles <i>Orbán, F.</i>	217
On the buckling of medium-length thin-walled cylinders under wind loading <i>Pircher, M.</i>	223
Response surface method in optimum design of stiffened composite shells <i>Rikards, R., Aužins, J. & Kalnins, K.</i>	229
Parametric studies of uniaxially compressed and laterally loaded stiffened plates for minimum cost <i>Virág, Z. & Jármai, K.</i>	237
Analysis of the internal shell stability of the cylindrical vertical double-shell tank under the conditions of the hydrostatic test <i>Ziółko, J., Supernak, E. & Mikulski, T.</i>	243
 <i>6 Special optimization problems</i>	
Shakedown loading optimization for circular plates <i>Atkočiūnas, J., Rimkus, L. & Jarmolajeva, E.</i>	251
Minimum structural weight with manufacturing tolerances constraints <i>Bauer, J., Gutkowski, W. & Latałski, J.</i>	259
Optimal design of space structures with stability constraints <i>Csébfalvi, A.</i>	265
Application of multicriteria optimization in layout optimization of structures <i>Kaliszky, S. & Lógó, J.</i>	271
Practicable accuracy of minimum weight designs of a planar machining platform <i>Long, C.S., Snyman, J.A. & Groenwold, A.A.</i>	277
Wearing process of the rolling elements of an underslung crane <i>Páczelt, I. & Baksa, A.</i>	287
A model parameter updating damage detection technique using genetic algorithm <i>Raich, A. & Liszkai, T.</i>	293
Constrained particle swarm searches in the optimal sizing design of truss structures <i>Wilke, D.N., Schutte, J.F. & Groenwold, A.A.</i>	301
 <i>7 Applications</i>	
Application of FEM in the production of welded railway vehicle parts <i>Borhy, I. & Kovács, L.</i>	311
Conceptual design of a DutchEVO car body structure <i>Ermolaeva, N.S., van Nieuwkoop, P., Welten, J.E.G., van der Hulst, E.C. & Kandachar, P.V.</i>	317
The structural design and construction of ice-hockey hall in Košice <i>Kanócz, J. & Kmet', S.</i>	325
Application of ConSteel© in design of UTE Stadium <i>Papp, F.</i>	329

Steel structure of Budapest Arena <i>Somogyi, J.</i>	337
Welding of 130 mm thick flanges for Dubrovnik Bridge <i>Turčić, F.</i>	343
Optimisation of an off-road vehicle frame <i>Visser-Uys, P.E. & Els, P.S.</i>	343
<i>8 Special problems of applied mechanics</i>	
A numerical method for stabilization problems using proximal-point approach <i>Azhmyakov, V.</i>	357
Stress distribution of plates with two circular holes stiffened by elastic rings <i>Chukin, V., Timár, I., Rédey, Á. & Torsky, A.</i>	363
Analysis of behaviour of horizontal safety system <i>Ivančo, V., Kubín, K. & Kostolný, K.</i>	369
Measurement of permanent deformation in surfacing and spray welding <i>Péter, L. & Kiss, L.</i>	373
Static analysis of structures on the base of heterogeneous models <i>Savula, Y. & Savula, N.</i>	381
Numerical analysis of the stress distribution in an electron beam welded worm wheel <i>Vorel, M. & Leidich, E.</i>	387
