Volume 1

Preface	XV
Organizing and advisory committees	XVII
Reviewers	XXI
Sponsors	XXIV

Keynote lecture

Use of Claude Bernard's scientific method to understand debris flow <i>A.M. Johnson</i>	3
--	---

Special lectures

Hazard assessment and mapping of mountain risks in Switzerland <i>A. Petrascheck & H. Kienholz</i>	25
Managing the risks of natural hazards <i>P. Greminger</i>	39

Debris-flow occurrence and initiation

Distribution model for periods of debris-flow danger <i>N.L. Belaya</i>	59
Wildfire-related debris-flow generation through episodic progressive sediment-bulking processes, western USA <i>S.H. Cannon, J.E. Gartner, C. Parrett & M. Parise</i>	71
Probabilistic equation of critical slope for debris-flow occurrence <i>J.C. Chen & C.D. Jan</i>	83
Controls on shallow landslide size <i>M. Casadei & W.E. Dietrich</i>	91
Determination of critical rainfall thresholds for debris-flow occurrence in central Taiwan and their revision after the 1999 Chi-Chi great earthquake <i>J.-C. Fan, C.-H. Liu, M.-F. Wu & S.-K. Yu</i>	103

Debris-flow events in the eastern Pyrenees: preliminary study on initiation and propagation <i>M. Hürlimann, J. Corominas, J. Moya & R. Copons</i>	115
Hillslope debris-flow frequency since the beginning the 20th century in the Massif des Ecrins (French Alps) <i>V. Jomelli, D. Brunstein, C. Chochillon & P. Pech</i>	127
Debris-flow recognition using an extended version of the river basin simulation model <i>V.I. Klenov</i>	139
Judging the timing of peak rainfall and the initiation of debris flow by monitoring runoff <i>Y. Onda, T. Mizuyama & Y. Kato</i>	147
Debris-flow initiation from large, slow-moving landslides <i>M.E. Reid, D.L. Brien, R.G. LaHusen, J.J. Roering, J. de la Fuente & S.D. Ellen</i>	155
Triggering factors for rapid mass movements in Iceland <i>T. Saemundsson, H.G. Petursson & A. Decaulne</i>	167
A model for spatially and temporally distributed shallow landslide initiation by rainfall infiltration <i>W.Z. Savage, J.W. Godt & R.L. Baum</i>	179
The evolution of glaciers and debris flows in the vicinity of Elbrus, central Caucasus <i>I. Seinova & E. Zolotarev</i>	189
Influence of climate change on mudflow activity on the northern slope of the Zailiysky Alatau Mountains, Kazakhstan <i>R.K. Yafyazova</i>	199
 <i>Debris-flow deposits and fan morphology</i>	
Debris-flow frequency derived from tree-ring analyses and geomorphic mapping, Valais, Switzerland <i>H. Gärtner, M. Stoffel, I. Lièvre, D. Conus, M. Grichting & M. Monbaron</i>	207
Debris-flow deposits and watershed erosion rates near southern Death Valley, CA, United States <i>K.M. Schmidt & C.M. Menges</i>	219
Dendrogeomorphological investigations of debris-flow occurrence in the Maritime Alps (northwestern Italy) <i>M.C. Stefanini & A. Ribolini</i>	231
Comparison of reconstructed debris-flow event years (Ritigraben, Switzerland) and existing flooding data in neighboring rivers <i>M. Stoffel, H. Gärtner, I. Lièvre & M. Monbaron</i>	243
 <i>Mechanics of debris flows</i>	
Role of particle network in concentrated mud suspensions <i>C. Ancey</i>	257
Fully developed debris-flow snout profiles described by flow and rheological characteristics of generalized viscoplastic fluids <i>C.L. Chen</i>	269
Numerical simulation of debris-flow initiation <i>R.H. Chen & H.Z. Tseng</i>	281
Combined MRI-rheometry determination of the behavior of mud suspensions <i>P. Coussot, J.S. Raynaud & C. Ancey</i>	291
The debris-flow rheology myth <i>R.M. Iverson</i>	303

Debris flows generated by seepage failure of landslide dams <i>W.M. Liao & H.T. Chou</i>	315
Triggering of debris flow caused by groundwater upwelling and surface runoff <i>M.-L. Lin & B.-S. Chang</i>	327
Roll waves on a shallow layer of debris modeled as a dilatant fluid <i>S. Longo</i>	339
Flow susceptibility of heterogeneous marly formations: implications for torrent hazard control in the Barcelonnette Basin (Alpes-de-Haute-Provence, France) <i>J.-P. Malet, A. Remaître, O. Maquaire, C. Ancey & J. Locat</i>	351
Experimental analysis on the rheological properties of a debris-flow deposit <i>R. Martino</i>	363
Study of a debris-flow event by coupling a geomorphological and a rheological investigation, example of the Faucon stream (Alpes-de-Haute-Provence, France) <i>A. Remaître, J.-P. Malet, O. Maquaire & C. Ancey</i>	375
The ball measuring system – a new method to determine debris-flow rheology? <i>M. Schatzmann, G.R. Bezzola, H.E. Minor & P. Fischer</i>	387
Motion of landslide-induced debris flow <i>T. Takahashi, Y. Satofuka & S. Kashimoto</i>	399
Behavior of big boulders in debris flow containing sand and gravel <i>M. Yamagishi, T. Mizuyama, Y. Satofuka & H. Mizuno</i>	411
 <i>Hydraulic and mathematical simulation models of debris flows</i>	
Experimental analysis of the general features of uniform mudflow <i>A. Armanini, C. Dalrì, L. Fraccarollo, M. Larcher & E. Zorzin</i>	423
The potential of the Discrete Element Method to simulate debris flow <i>B.N. Asmar, P.A. Langston & P. Ergenzinger</i>	435
Mathematical modeling and experimental tests of unsteady flow of non-Newtonian fluids <i>D. Berzi & S. Mambretti</i>	447
Numerical simulation of debris flow over erodible bed <i>T. Itoh, K. Miyamoto & S. Egashira</i>	457
Three-dimensional numerical simulation of debris flows and its applications <i>K.F. Liu & M.C. Huang</i>	469
Objectives for the development of an integrated three-dimensional continuum model for the analysis of landslide runout <i>S.D. McDougall & O. Hungr</i>	481
Granular avalanche model in arbitrarily curved and twisted mountain terrain: a basis for the extension to debris flow <i>S.P. Pudasaini & K. Hutter</i>	491
Surge dynamics coupled to pore-pressure evolution in debris flows <i>S.B. Savage & R.M. Iverson</i>	503
Application of two-layer simulation model for unifying debris flow and sediment sheet flow and its improvement <i>J. Takahama, Y. Fujita, K. Hachiya & K. Yoshino</i>	515
Debris-flow capturing effect of a grid-type steel-made sabo dam using 3D distinct element method <i>N. Miyazawa, T. Tanishima, K. Sunada & S. Oishi</i>	527

Numerical simulation of dam break flow on granular bed: intense sediment transport vs. debris-flow modeling <i>A. Valiani & V. Caleffi</i>	539
 <i>Application of debris-flow simulation models</i>	
Two-dimensional model of the 1998 Sarno debris flows (Italy): preliminary results <i>P. Aleotti & G. Polloni</i>	553
Resistance laws for debris-flow numerical simulation <i>M. Arattano & L. Franzì</i>	565
Debris-flow simulations for Tsing Shan in Hong Kong <i>K.H. Lo & K.T. Chau</i>	577
Hazard mapping for debris-flow events in the alluvial fans of northern Venezuela <i>R. García, J.L. López, M. Noya, M.E. Bello, M.T. Bello, N. González, G. Paredes, M.I. Vivas & J.S. O'Brien</i>	589
Experimental investigation and mathematical simulation of debris-flow runout distance and deposition area <i>P. Ghilardi, L. Natale & F. Savi</i>	601
A simplified numerical model for debris-flow hazard assessment: DEFLIMO <i>M.A. Lenzi, V. D'Agostino, C. Gregoretti & D. Sonda</i>	611
Assessing debris-flow susceptibility through cellular automata modelling: an example from the May 1998 disaster at Pizzo d'Alvano (Campania – southern Italy) <i>G. Iovine, S. Di Gregorio & V. Lupiano</i>	623
Comparison of numerical simulation of muddy debris-flow spreading to records of real events <i>D. Laigle, A.-F. Hector, J. Hübl & D. Rickenmann</i>	635
Systematic comparison of debris-flow laws at the Illgraben torrent, Switzerland <i>B.W. McArdell, B. Zanuttigh, A. Lamberti & D. Rickenmann</i>	647
Bed-elevation variations inside the Mega-Dike system in the Pasig-Potrero river basin using a 2D numerical model of mudflows <i>N. Miyazawa, K. Sunada, S. Oishi & K. Hirabayashi</i>	659
Numerical simulation of sediment disasters caused by heavy rainfall in the Camuri Grande basin, Venezuela 1999 <i>H. Nakagawa, T. Takahashi, Y. Satofuka & K. Kawaike</i>	671
Reasonable assumptions in routing a dam-break mudflow <i>J.S. O'Brien</i>	683
Runoff analysis of debris flows at Mt. Unzendake volcano, Japan <i>K. Park & H. Hashimoto</i>	695
Formulation of a two-dimensional unsteady debris-flow model for analysis of debris-flow hazards and countermeasures thereof <i>D. Pianese & L. Barbiero</i>	705

Volume 2

Debris-flow monitoring and alert systems

- Monitoring the presence of the debris-flow front and its velocity through ground vibration detectors 719
M. Arattano
- Evaluation of a system for detecting debris flows and warning road traffic at bridges susceptible to debris-flow hazard 731
S.Y. Chang
- Experimental study of the underground sound generated by debris flows 743
C.-J. Huang, H.-Y. Yin & C.-L. Shieh
- Notes on the modeling of debris-flow surface images 755
H. Inaba & Y. Itakura
- Integrated debris-flow monitoring system and virtual center 767
K.F. Liu & S.C. Chen
- Measurement of debris-flow surface characteristics through close-range photogrammetry 775
S. Zhang & J. Chen

Measurements of debris-flow characteristics

- Debris-flow hazard assessment applying the resistivity imaging method: case study of Cancia (Dolomites, northeastern Italy) 787
N. Abu-Zeid, S. Furlanis, E. Oddone, M. Bacchini, E. Gaspari, F. Tagliavini & A. Zannoni
- Classification of debris-flow deposits for hazard assessment in alpine areas 799
E. Bardou, C. Ancey, C. Bonnard & L. Vulliet
- Complete grain-size analyses on debris-flow source area in the Carrara marble basins, Apuane Alps, Italy 809
C. Baroni, G. Bruschi, A. Criscuolo, G. Mandrone & A. Ribolini
- Validation of semi-empirical relationships for the definition of debris-flow behavior in granular materials 821
G.B. Crosta, S. Cucchiario & P. Frattini
- Field and laboratory study on the deposition features of a debris flow 833
A.M. Deganutti, P.R. Tecca, R. Genevois & A. Galgaro
- Dumpling – an “intelligent” boulder for studying internal processes of debris flows 843
J. Hanisch, P. Ergenzinger & M. Bonte
- Flow properties of debris flows on the Kitamata Valley of the Name River, Japan 851
A. Ikeda & Y. Hara
- An oil-immersed microphone sensor for improved debris-flow detection 863
Y. Itakura & T. Sawada
- A real-time assessment of lahar dynamics and sediment load based on video-camera recording at Semeru volcano, Indonesia 871
F. Lavigne, A. Tirel, D. Le Floch & S. Veyrat-Charvillon
- Erosion by debris flows in field and laboratory experiments 883
D. Rickenmann, D. Weber & B. Stepanov
- Energy radiation by elastic waves from debris flows 895
H. Suwa, J. Akamatsu & Y. Nagai
- Velocity distributions in a coarse debris flow 905
P.R. Tecca, A.M. Deganutti, R. Genevois & A. Galgaro

Case studies of debris flows

- Landslides and debris flows induced by typhoon Toraji, July 29-30, 2001 in central Taiwan 919
J.D. Cheng, J.L. Yeh, Y.H. Deng, H.L. Wu & C.D. Hsei
- Causes and consequences of the 1993 debris flows and landslides in the Kulekhani watershed, central Nepal 931
M.R. Dhital
- Comparison of debris-flow events in three contiguous basins, triggered during the same storm event 943
G. Bianco & L. Franzi
- Debris-flow distribution and hazards along the Sichuan-Tibet and Sino-Nepal highway, Tibet, China 955
Y.P. He, J. Chen, Y. Li & P. Cui
- Regional assessment of contemporary debris-flow activity in Lake District mountain catchments, northern England: occurrence, scale and process 965
R.M. Johnson & J. Warburton
- Hazard assessment of potential debris flows in the watershed of Chen-You-Lan river 977
P.S. Lin, J.Y. Lin & J.H. Lee
- Hydrologic and geomorphologic evaluation of the 1999 debris-flow event in Venezuela 989
J.L. López, D. Pérez & R. García
- Classification of debris-flow phenomena: geographic approach, case studies in the former USSR 1001
V.F. Perov
- Hurricane Pauline - its impact on Acapulco and subsequent debris-flow prevention measures 1013
R.M. Spang, S.H. Castaneda & E.M. Gomez
- Repetition of debris flows on sunny days at a torrent in Karakorum 1025
H. Suwa
- The October 15, 2000 debris flow in the Bioley torrent, Fenis, Aosta valley, Italy – damage and processes 1037
D. Tropeano, L. Turconi, M. Rosso & C. Cavallo
- Debris-flow occurrence after the 2000 eruption of Miyakejima volcano 1049
T. Yamakoshi, M. Nakano, M. Watari, T. Mizuyama & T. Chiba
- Debris-flow hazards in the Baksan river basin, Tynryauz, Russia 1059
E.V. Zaporozhchenko

Prediction and assessment of debris-flow hazards

- DAMOCLES: Debris-fall assessment in mountain catchments for local end-users 1073
J.C. Bathurst, G.B. Crosta, J.M. García-Ruiz, F. Guzzetti, M.A. Lenzi & S. Ríos Aragón
- Estimating debris-flow probability using fan stratigraphy, historic records, and drainage-basin morphology, Interstate 70 highway corridor, central Colorado, U.S.A. 1085
J.A. Coe, J.W. Godt, M. Parise & A. Moscarillo
- Geomorphological estimation of debris-flow volumes in alpine basins 1097
V. D'Agostino & L. Marchi
- Debris-flows characteristics in the Gleidarhjalli area, northwestern Iceland 1107
A. Decaulne & T. Saemundsson
- Enlisting the support of land-use planners to reduce debris-flow hazards in the United States 1119
P.L. Gori, S.P. Jeer & L.M. Highland
- Integral analysis of debris flow in an Alpine torrent – the case study of Tschengls 1129
W. Gostner, G.R. Bezzola, M. Schatzmann & H.E. Minor

GIS-based modeling of debris-flow initiation, transport and deposition zones for regional hazard assessments in western Oregon, USA <i>R.J. Hofmeister & D.J. Miller</i>	1141
Regional-scale models of debris flows triggered by lake outbursts: the June 25, 2001 debris-flow at Täsch (Switzerland) as a test study <i>C. Huggel, A. Kääh & W. Haerberli</i>	1151
Reliability analysis on design discharge of debris flow <i>C.D. Jan, M.H. Lee & J.C. Chen</i>	1163
PROMOTOR- <i>df</i> : a GIS-based simulation model for debris-flow hazard prediction <i>A. de Jooode & H. van Steijn</i>	1173
Volcanic debris flows in developing countries – the extreme need for public education and awareness of debris-flow hazards <i>J.J. Major, S.P. Schilling & C.R. Pullinger</i>	1185
Forest practices and mitigation of debris-flow risk in Oregon, USA <i>K. Mills, J. Paul, J. Hinkle & A. Skaugset</i>	1197
Building damage by debris flows in the Sarno area, southern Italy <i>G. Toyos, C. Oppenheimer, M.T. Pareschi, R. Sulpizio, G. Zanchetta & G. Zuccaro</i>	1209
Geomorphic classification of alpine catchments for debris-flow hazard reduction <i>D. Tropeano & L. Turconi</i>	1221
Forewarning model of landslides triggered by rainfall <i>P. Versace, B. Sirangelo & G. Capparelli</i>	1233
Evaluating tsunami hazards from debris flows <i>P. Watts & J.S. Walder</i>	1245
Remote sensing of rainfall for debris-flow hazard assessment <i>G.F. Wieczorek, J.A. Coe & J.W. Godt</i>	1257
 <i>Countermeasures against debris-flow hazards</i>	
Designing a highway crossing of a major debris flow – in the face of potential recurrences <i>M.N. Cheema & E.J. Lesleighter</i>	1271
Characteristics of debris-flow activity and strategy of hazards mitigation along highways in Tibet (Xizang Autonomous Region) <i>P. Cui, N.S. Chen, Y.P. He, Y. Li & Z.X. Jiang</i>	1281
Sediment transport and deposition in a steep open channel with multiple rows of cylinders <i>H. Hashimoto & K. Park</i>	1291
Control structures, vulnerability, cost-effectiveness – a contribution to the management of risks from debris torrents <i>H. Romang, H. Kienholz, R. Kimmerle & A. Böll</i>	1303
Debris-trapping efficiency of crossing-truss open-type check dams <i>C.-C. Wu & Y.-R. Chang</i>	1315
 <i>Indices</i>	
Keyword index	1329
Author index	1333
